

At QIPC you can always be yourself!

Q.I. Press Controls is specialised in the development, production and worldwide sales of peripheral devices in the graphic industry. These advanced systems consist of high tech optical measurement systems which are combined with computer based control systems. Q.I. Press Controls is an innovative enterprise that has won several prizes. Among other prizes Q.I. Press Controls has won the "Brabantse Economieprijs" for the most innovative company in Brabant, which was awarded to us by an expert jury.

At Q.I. Press Controls we feel that the employees are of major importance, therefore we offer collective lunch and coffee breaks, lunch events, Friday afternoon drinks, an annual barbeque, ergonomic work spaces, etc. The commitment of our employees is very high, not only at the main office in the Netherlands but also at our foreign offices. The short communication lines, the informal behaviour and always being open to new ideas are characteristic for our company.

To facilitate our growth we are looking for a:

Project Engineer

The function:

The Research & Development department is the department where hard team work results in the newest innovations of our automating systems. At this department a 40 hour per week job has opened up for a Project Engineer. After a training period in which you will learn all about the printing processes in the graphical industry, you will be (joint) responsible for translating project specifications to the internal parties involved. You will communicate with multiple technical departments at Q.I. Press Controls as well with the customer itself. For this function an enhanced set of skills, such as mechanical and electrical knowledge and experience, is required. Furthermore, you are familiar with and interested in software.

The right candidate:

A completed study (Bachelor) in the field of mechanical engineering, electrical technique, or any other relevant field with at least 5 years of working experience. In this function you will perform specification visits yourself for larger projects at our customers throughout the world. You can easily communicate in both English and German with all parties involved in our projects. You have experience with a dynamic work environment and possess a good problem solving capacity for technical issues. Furthermore, a creative personality is considered a major importance as well as someone with a customer oriented attitude. Experience with (technical) drawing programs is an advantage.

Are we talking about you?

This means that you are more than welcome to join us at QIPC. Please send your letter of application and your C.V. to:

Q.I. Press Controls
