

At QIPC you can always be yourself!

Q.I. Press Controls is specialised in the development, production and worldwide sales of peripheral devices in the graphic industry. These advanced systems consist of high tech optical measurement systems which are combined with computer based control systems. Q.I. Press Controls is an innovative enterprise that has won several prizes. Among other prizes Q.I. Press Controls has won the "Brabantse Economieprijs" for the most innovative company in Brabant, which was awarded to us by an expert jury.

At Q.I. Press Controls we feel that the employees are of major importance, therefore we offer collective lunch and coffee breaks, lunch events, Friday afternoon drinks, an annual barbeque, ergonomic work spaces, etc. The commitment of our employees is very high, not only at the main office in the Netherlands but also at our foreign offices. The short communication lines, the informal behaviour and always being open to new ideas are characteristic for our company.

To facilitate our growth we are looking for a:

Software Support Engineer

The function:

A challenging task where you will act as a bridge between Technical Support and Customer Support and on the other hand our departments Service and Research & Development. You will support our engineers in the field and make sure that all of our products are functioning properly. Your technical knowledge will be used to train clients and colleagues, solve and analyse problems with our customers or at their location itself. You have a solid knowledge of software and analysing and testing code. Therefore you are able to work closely with our Research and Development colleagues and manage to solve complex technical problems yourself. Everything will take place in an international setting whereby you will communicate with clients and colleagues worldwide.

The right candidate:

You obtained a bachelor degree, either by education or experience. You have affinity with IT such as Windows 10, XP, Linux, Network topology and VPN. As well as an interest in software such as scripting languages (Python). You are able to detect improvements, work efficiently and independently. Additionally you are pro active, an organiser and coordinator. You communicate easily with all of your colleagues and with our clients in Dutch, English and German. You feel comfortable in a team that tries to create structure in a hectic environment. Furthermore, you have a customer oriented attitude but a creative personality is just as important.

Are we talking about you?

This means that you are more than welcome to join us at QIPC.

Please send your letter of application and your C.V. to:

Q.I. Press Controls
