

## Q.I. PRESS CONTROLS PARTNERS WITH PERRETTA GRAPHICS

**Oosterhout, August 2014** – Again Q.I. Press Controls invests in expanding its offerings to the market. In April this year Q.I. Press Controls acquired the business and assets of EAE, the control and automation specialist for printing machines. Now Q.I. Press Controls proudly announces they have entered into a partnership with Perretta Graphics.

Perretta Graphics Corporation is an American organization and global leader in the development and sale of remote ink and register control, ink pre-set systems, register motorization and more. The complete product portfolio of Perretta Graphics will be added to the already extensive portfolio offered by Q.I. Press Controls' world wide offices and agent network.

"With this partnership we can offer our customers an even more comprehensive solution," states Menno Jansen, Chairman of Q.I. Press Controls. "Efficiency improvement will be one of the many advantages of offering such a broad portfolio. Not only because of the joint understanding and management of this greater part of the production process but also as customers can rely on one partner to coordinate that complete process."

"The fundamentals of Perretta Graphics, innovation, quality and customer service are in line with ours. Given the know-how and abilities of all involved new innovations are bound to arise in the near future. This together with the availability of our strong standing global office and agent network to service and support the market, makes us confident. Confident in once again having set another step to realizing our goal of simplifying the steadily growing complexity of the printing process and being able to offer our customer a "one stop" total solution", Menno Jansen concludes.

### About Perretta Graphics Corporation

Founded in 1981 and located in Poughkeepsie New York. Perretta Graphics is a global leader in providing remote ink and register controls for the horizontal and vertical press market. The segmented fountain blade invented in the late 1970's by co founder Frank Perretta has become a standard in its industry and gives proof of the company's innovative and progressive character.
